

ASIAN WATERBIRD CENSUS 2023

SUMMARY REPORT

© Wetlands International South Asia, Bombay Natural History Society and National Biodiversity Authority

Data collection

Asian Waterbird Census Volunteers and Biodiversity Management Committee Members

AWC Coordination

Mr Dhruv Verma, AWC India National Coordinator, Wetlands International South Asia

Dr P. Sathiyaselvam, AWC India National Coordinator, Bombay Natural History Society

Dr Sangita Mitra, Domain Expert (Tech & SBB), National Biodiversity Authority

AWC India State Coordinators (see Annexure 4)

State Biodiversity Boards and Union Territory Biodiversity Councils

Bird Count India

International Waterbird Census (IWC)

Report drafting

Ms Apoorva Thapa, Junior Technical Officer - Biodiversity, Wetlands International South Asia

Mr Arghya Chakrabarty, Technical Officer - Biodiversity, Wetlands International South Asia

Mr Dhruv Verma, Senior Technical Officer and AWC National Coordinator, Wetlands International South Asia

Review

Dr Ritesh Kumar, Director, Wetlands International South Asia

Dr Taej Mundkur, International Waterbird Census Coordinator and Senior Advisor, Wetlands International

Mr C. Achalender Reddy, IFS (Retd.), Chairperson, National Biodiversity Authority

Asian Waterbird Census 2023: Results of the annual waterbird and wetland monitoring programme in India

Acknowledgements

We extend our deepest appreciation to the extensive network of Asian Waterbird Census volunteers across the mainland and the Andaman and Nicobar Islands who represent citizen science-based birders group, civil society organizations, university students and researchers, members of the Biodiversity Management Committees and officials of the State Forest and Wildlife Departments who participated in the monitoring efforts in the Asian Waterbird Census (AWC) 2023. Their hard work, time and contribution towards field counts and preparation of this report is invaluable.

We are grateful to all wetland managers and protected area managers for extending their enthusiastic support to the AWC network to successfully conduct the census at their sites.

We are indebted to the officials of State Biodiversity Boards, Union Territory Biodiversity Councils, State Forest and Wildlife Departments, and AWC India State Coordinators for meticulously planning and implementing the AWC in sites of ornithological importance. This collaborative endeavour of monitoring waterbirds and wetlands was not possible without their advice and guidance at all stages of this report preparation.

We also thank Dr Taej Mundkur, International Waterbird Census (IWC Coordinator) and Mr Tom Langendoen IWC Data Manager for supporting in effective planning and execution of the census as well as their assistance in the review of this report.

We also express our gratitude to Mr Praveen J. and other colleagues at Bird Count India for jointly promoting AWC in the country, managing the AWC India ebird database, encouraging a large network of birdwatchers to take part in the census and review of this report.

We sincerely acknowledge the guidance provided by the Mr C. Achalender Reddy, IFS (Retd.), Chairperson of the National Biodiversity Authority towards institutionalizing the AWC within the operations of Biodiversity Boards & Councils as an annual affair. We are indebted to Dr. B. Balaji, IFS, Secretary NBA, Dr Sangita Mitra, Consultant and others at the NBA for their contribution in both planning and implementing this activity.

We highly value the support and guidance of the advisory board of the Wetlands International South Asia, Dr Sidharth Kaul (President), Dr J.K. Garg (Vice President), Mr Pijush Sinha (Treasurer), and other members towards mainstreaming AWC efforts within national level conservation programmes and actions, and in preparation of this report.

Last but not least, we are thankful to our colleagues at Wetlands International, Bombay Natural History Society and National Biodiversity Authority for successfully coordinating this collaboration, from the early stages of conceptualization, to providing trainings, planning, and data analysis leading to the release of this report.

Summary

The Asian Waterbird Census (AWC) is a citizen science initiative which a part of the global International Waterbird Census (IWC) that documents the state of waterbirds and their habitat in order to aid in their conservation and management. It is jointly coordinated by the Bombay Natural History Society (BNHS) and Wetlands International South Asia in India. It fosters participation of local conservation enthusiasts in monitoring waterbird abundance and diversity and wetland condition.

In order to institutionalise waterbird monitoring in wetlands across the country and beyond the sites designated as protected areas, the AWC network partnered with the National Biodiversity Authority (NBA) since 2022. The AWC network at the national and state-level collaborated with the State Biodiversity Boards (SBBs), Union Territory Councils (UTBCs) and *panchayat*-level Biodiversity Management Committees (BMC) to promote participation of their members in wetland conservation and waterbird monitoring, and use the census to strengthen People Biodiversity Registers (PBRs) as mandated under section 41(1) of National Biodiversity Act (2002).

Under the guidance of AWC coordinators (Annexure 4) and officials of the SBB and the UTBC (Annexure 5), more than 1,800 volunteers (Annexure 6) participated in the annual waterbird counts covering 606 wetlands from 25 States and Union Territories (Annexure 1). Twenty-two Ramsar sites were covered during the AWC 2023 census. The annual census involved the participation of BMC members from Andhra Pradesh, Assam, Gujarat, Haryana, Himachal Pradesh, Odisha, Manipur, Telangana, and Tripura. A total of 214 waterbird and wetland-dependent bird species, with a total count of 35,93,953 were reported during the census (Annexure 2). The census also reported 33 IUCN Red Listed species (The IUCN Red List of Threatened Species, 2023) and fifteen high priority species enlisted under the Central Asian Flyway National Action Plan (CAF NAP) 2018-23, such as Black-bellied Tern, Common Pochard, Indian Skimmer and Lesser Adjutant, underlining its significance as an important biodiversity and habitat monitoring tool. The AWC also reports the condition of 447 wetlands, wherein habitat type and threats to wetlands and waterbirds are presented.

The census data supports conservation activities in the country by identifying significant wetlands, designating Ramsar Sites and Flyway Network Sites, and contributing to the National Biodiversity Strategy and Action Plan. It aids in including priority wetlands in national and state programs, national status assessments like the State of India's Birds report, and promoting community ownership in wetlands management and Important Bird and Biodiversity Areas (IBAs) globally. Additionally, the data supports species and wetland conservation, monitoring plans, and studies on bird movements and avian diseases.

1. Introduction to the Asian Waterbird Census

Waterbirds are an important component of wetland biota. Wetlands provide a biologically productive and diverse ecosystems, suitable to serve as essential breeding, feeding and resting grounds for a diverse range of resident and migratory waterbirds. Several factors govern the relationship between wetlands and waterbirds, the key being inundation regime and quality of water; availability of food and shelter; and the presence or absence of predators. Importantly waterbirds serve as bio-indicators of the ecological productivity of wetlands.

Conservation of waterbirds and their habitats needs to be based on quality data and long term as well as recent information on their distribution and trends. To effectively address this need, the Asian Waterbird Census (AWC) has been collating and disseminating information on waterbird counts and wetlands since 1987 to inform governments, conventions, and the public. The AWC runs in parallel with other waterbird censuses carried out in Africa, Europe, Central, and West Asia, the Caribbean, and Central and Southern America under the broad umbrella of the International Waterbird Census (IWC). The IWC is coordinated internationally by Wetlands International (except in the Caribbean and Central America) and is considered as one of the largest and longest-running internationally coordinated citizen-science biodiversity monitoring programmes in the world (<https://iwc.wetlands.org/index.php/aboutiwc>).

The primary objectives of IWC are:

- Monitoring changes in waterbird numbers and distribution by regular, standardized counts of representative wetlands.
- Providing the basis for estimates and trends of waterbird populations (e.g., Bamford et al., 2006 and Mundkur & Langendoen, 2022 within the East Asian – Australasian Flyway and the global estimates in the Waterbird Populations Portal (www.wpp.wetlands.org) managed by Wetlands International).
- Improving knowledge of lesser-known waterbird species and wetland sites.
- Increasing awareness of the importance of waterbirds and their wetland habitats at local, national, and international levels.

In India, AWC is jointly coordinated by the Bombay Natural History Society (BNHS) and Wetlands International South Asia, supported by state level coordinators on voluntary basis. The census is planned and carried out by these AWC India State level Coordinators and their field level volunteers. Data collected by the AWC contributes to planning and execution of conservation activities within the country such as identification of wetlands of conservation significance, designation as Ramsar Sites (under the Convention on Wetlands) and Flyway Network Sites (under the West/Central Asian Flyway Site Network of the Convention on Migratory Species), development of the National Biodiversity Strategy and Action Plan, inclusion of priority wetlands within National and State level programmes, feeding into national status assessments such as the State of India's Birds (<https://stateofindiasbirds.in/>) and promoting community ownership in wetlands management and Important Bird and Biodiversity Areas (IBAs) developed globally by BirdLife International. In addition, it supports species and wetland conservation and monitoring plans and studies on bird movements and relationships to avian diseases.

The summary report for AWC 2022 census, provides an analysis of waterbird counts undertaken between November 2022 to February 2023 from the aforementioned 25 States and Union Territories.

The annual AWC India count information is also summarised in longer term reports such as the AWC India 10 year report and is included in the rolling five year global summary reports on the IWC Portal (<https://iwc.wetlands.org/index.php/nattotals> and <https://iwc.wetlands.org/index.php/spectotals>) and through the AWC Site Network (<https://iwc.wetlands.org/index.php/awcsites>).

2. Asian Waterbird Census 2023

2.1 Methods

The Asian Waterbird Census 2023 commenced with the formal announcement of the census date, releasing AWC data collection forms and guidance protocols for standardised data collection on the webpage of Wetlands International South Asia, BNHS and Bird Count India in November 2022. The nationwide census was conducted from December 2022 to February 2023, with active participation from AWC State Coordinators and bird enthusiasts, SBB and UTBC officials and BMC members. The AWC 2023 data was received from the AWC State Coordinators, officials of the State Forest Department and Biodiversity Board, and eBird platform during April to July 2023 for analysis and reporting purposes ([IWC-Guidance-on-waterbird-monitoring-methodology-2018-1.pdf](https://wetlands.org/IWC-Guidance-on-waterbird-monitoring-methodology-2018-1.pdf) (wetlands.org)).

Additional census information from a few states is yet to be received. These additional details will be integrated into the final analysis and uploaded on the IWC Portal.

2.2 Results

2.2.1 Waterbirds reported and Wetlands covered

A total of 214 (Two hundred and fourteen) waterbird and wetland-dependent species were reported during the survey period. Additionally, 152 waterbird species were documented during the census (Annexure 3). Thirty-three species were listed under IUCN Red List (v. 2023). Some of the threatened species reported were such as Black-bellied Tern (Endangered), Indian Skimmer (Endangered), Common Pochard (Vulnerable), and Lesser Adjutant (Vulnerable) and a few under Near Threatened category were Black-necked Stork, Curlew Sandpiper, and Ferruginous Duck. These records reiterate the significance of these surveys for waterbird conservation. The total count for the waterbird and wetland dependent species reported by the volunteers during the AWC 2023 was 35,93,953 (Figure 2). During the field surveys, several terrestrial bird species were recorded and a few sites reported an over estimation of waterbird numbers of a few species, such records that have not been verified by the site coordinator have been omitted while computing results for this report.

Monitoring during the AWC 2023 was reported for 606 wetlands covers 25 four states and union territories (Figure 1 and Map 1). Out of the 606 wetlands included in the report, many lie within the network of national Protected Areas (PAs) and IBAs. A total of twenty-one wetlands designated as Ramsar sites (Map 2) were reported in the census. The highest number of wetlands surveyed was from Kerala, accounting for 116 wetlands, while only a single wetland was surveyed each for the states, Jharkhand, Madhya Pradesh, and Manipur (as per the reported data).

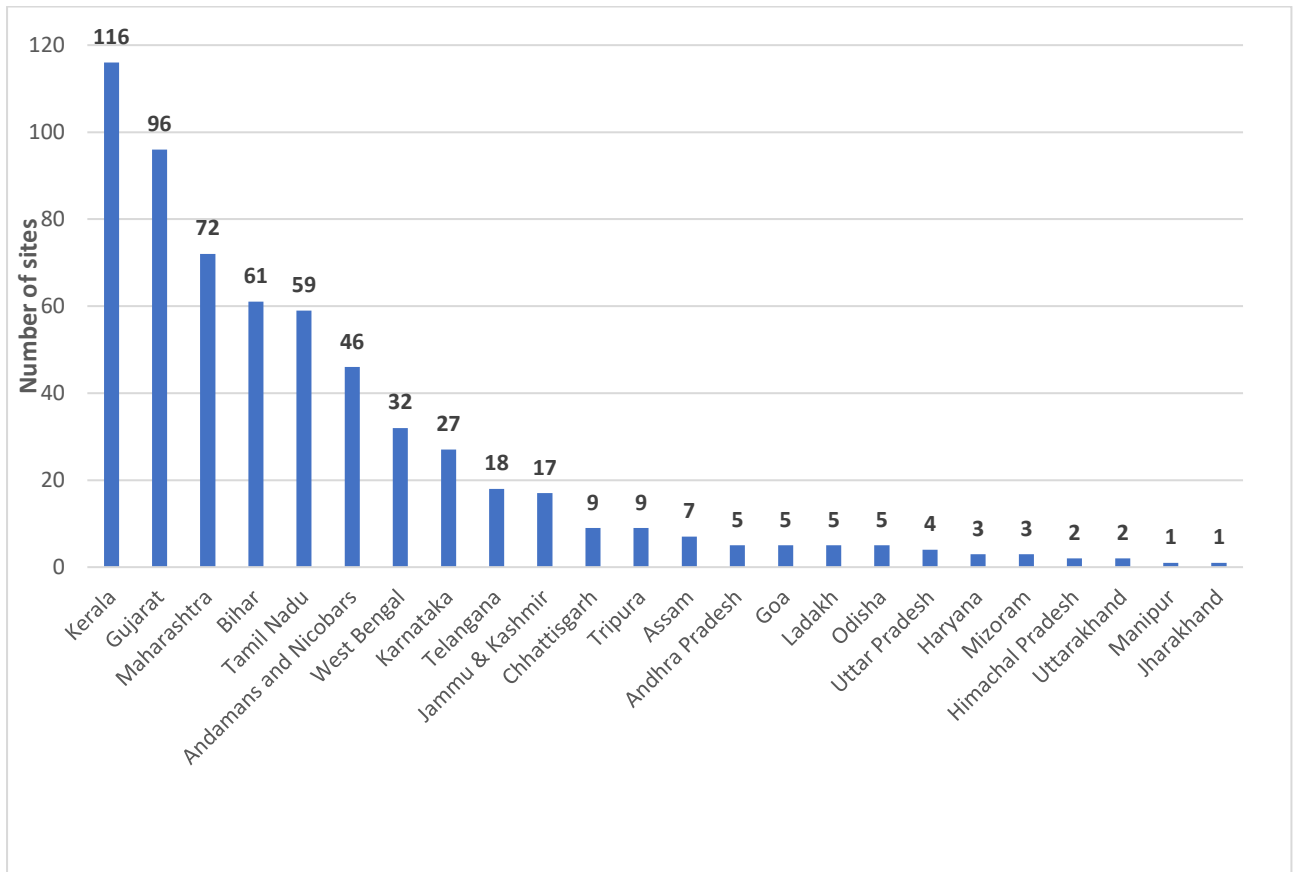

Figure 1 Number of sites reported in the AWC 2023

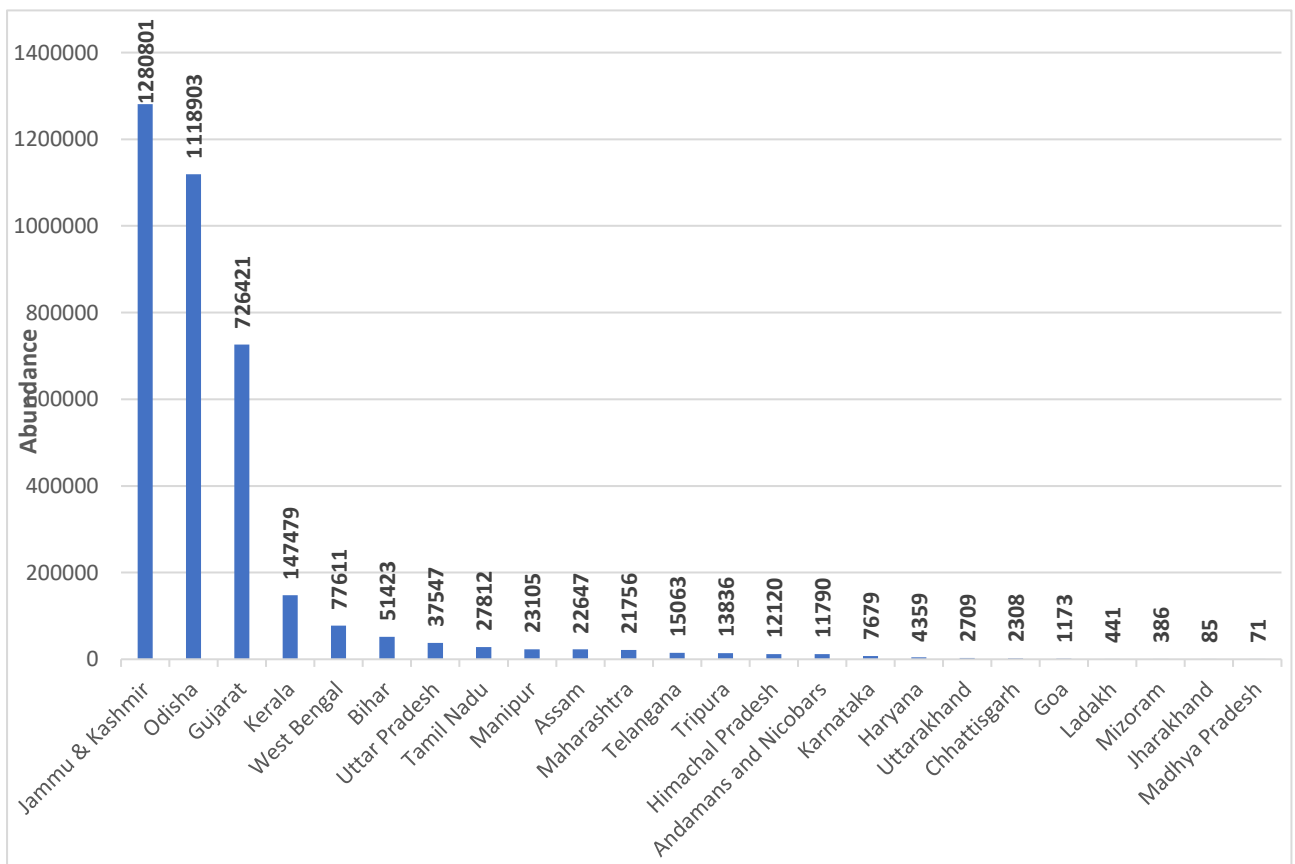

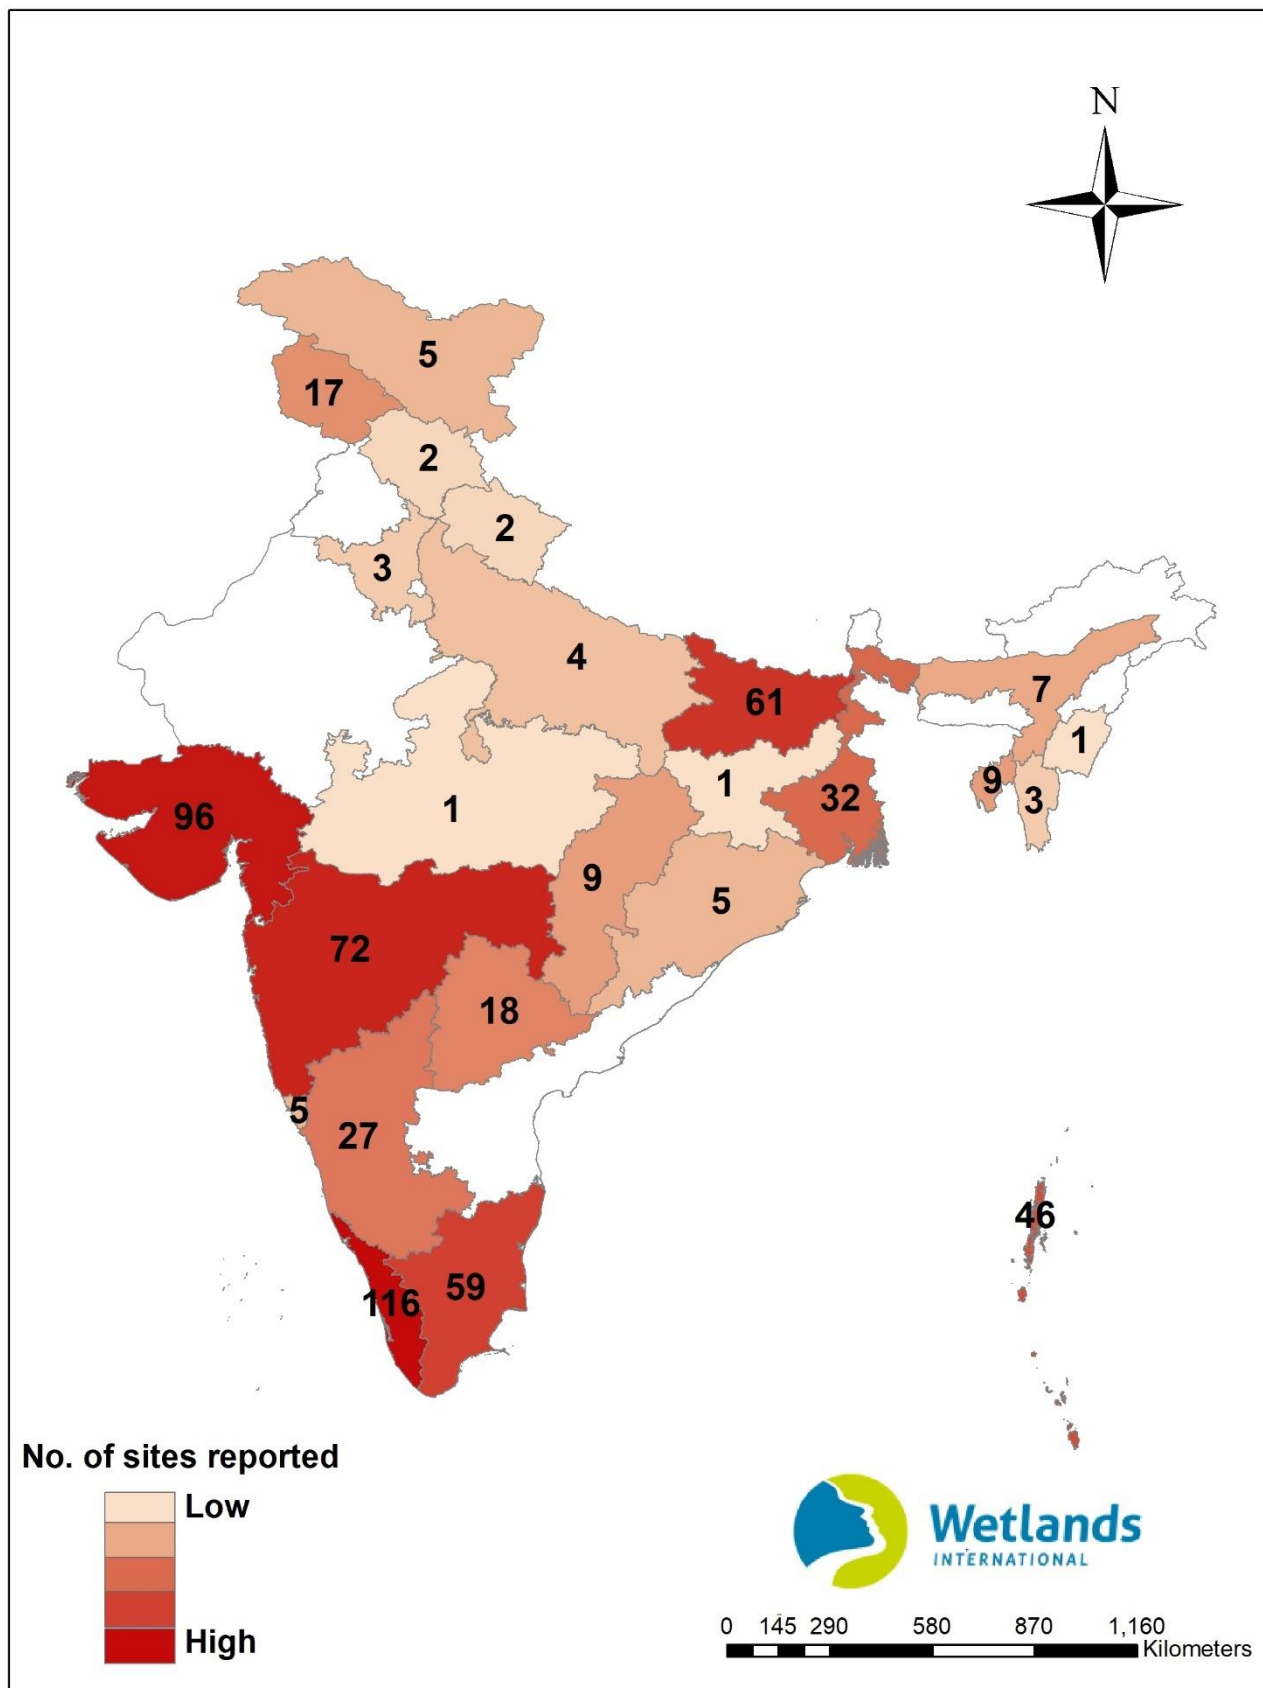

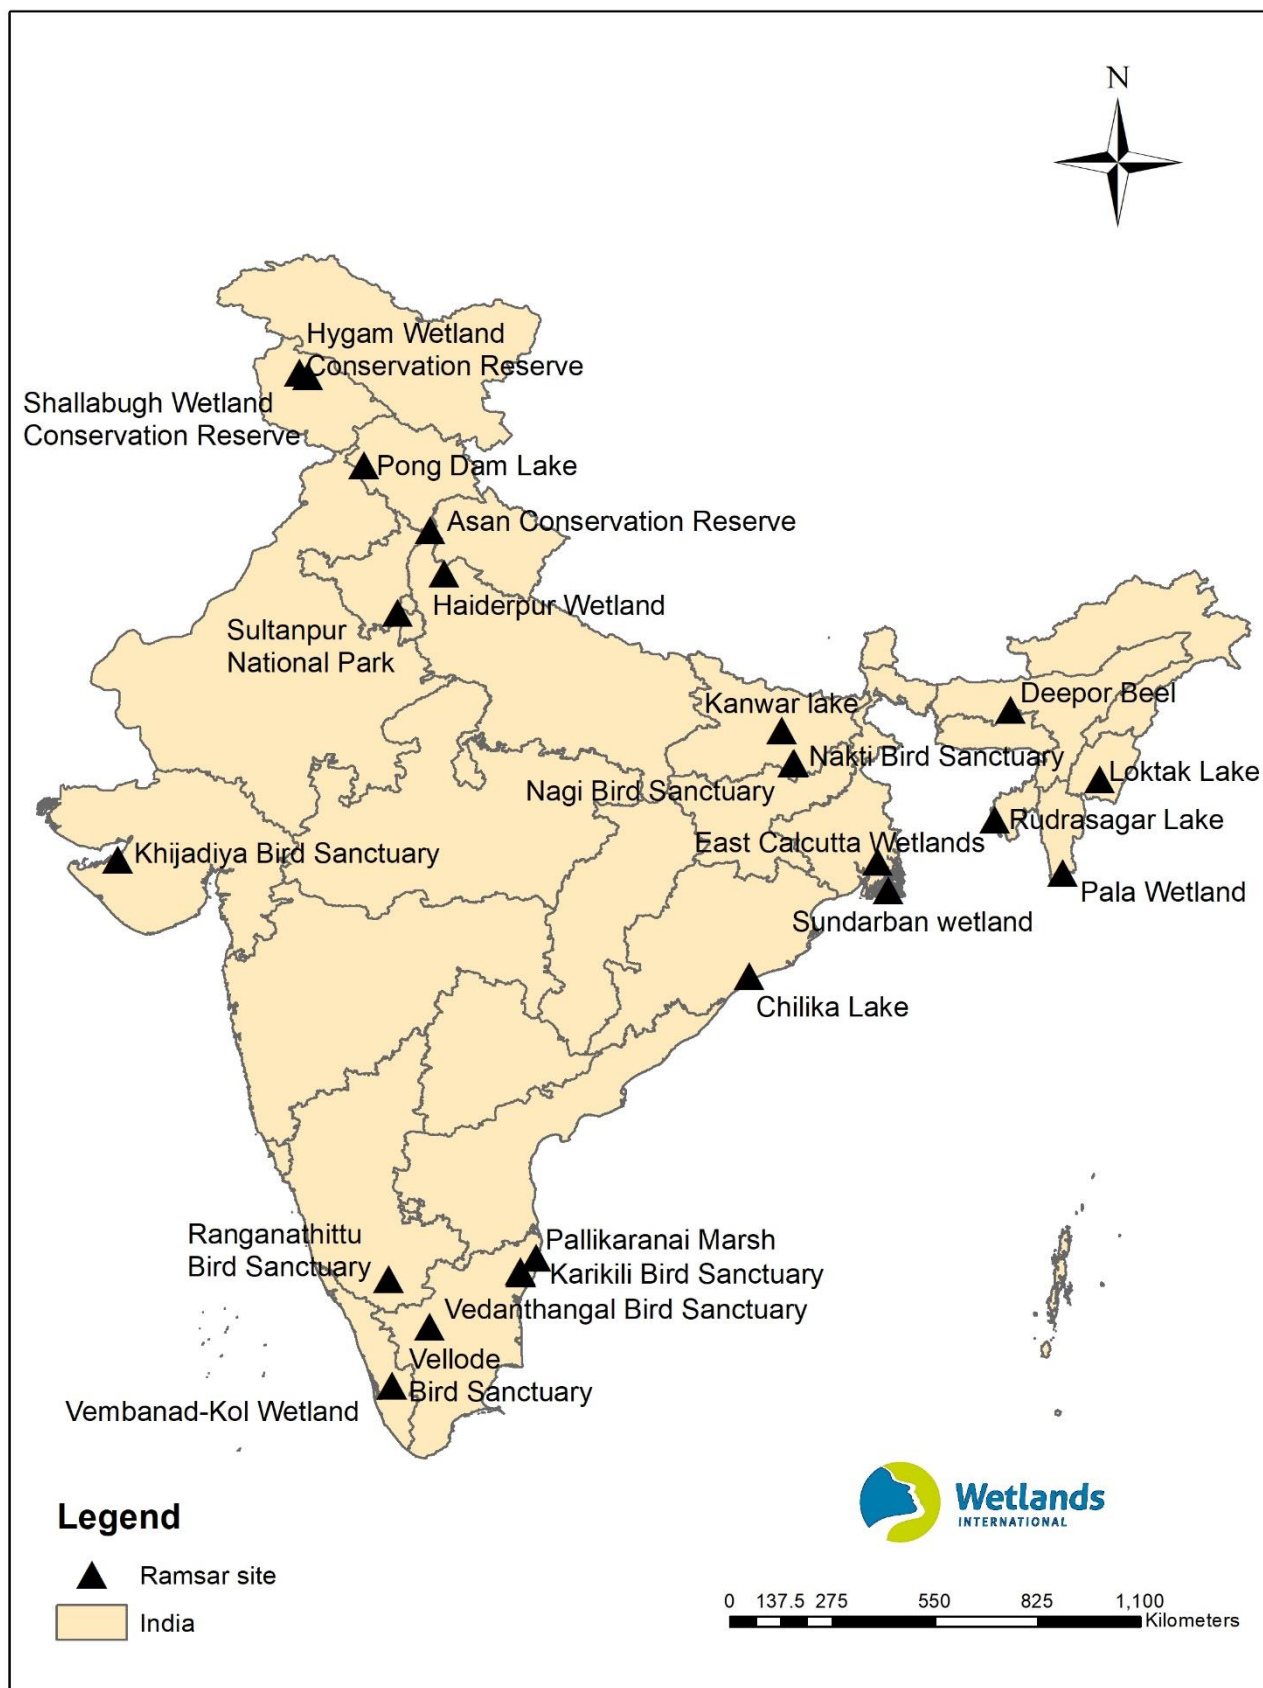

Figure 2 State-wise number of waterbirds reported in the AWC 2023

Map 1 State-wise distribution of wetland sites reported in the AWC 2023

Map 2 Ramsar sites reported during AWC 2023

2.2.2 Waterbird species abundance

The 2023 census reveals that the **Common Coot** was most abundant followed by the **Northern Pintail**, **Gadwall**, **Common Coot**, **Mallard**, and **Eurasian Wigeon**, all species listed as of Least Concern (LC) on the IUCN Red List. The list of the five most abundant waterbird species and the number of wetlands from which they have been reported is displayed in Figure 3.

Figure 3 Five most-abundant waterbird species reported during AWC 2023

Out of the 214 waterbird and wetland dependent species that were recorded, five were listed as Endangered, eight as Vulnerable, and twenty as Near-Threatened (Figure 4 and Map 3).

Figure 4 IUCN Red List Threatened and Near Threatened waterbird and wetland dependent species reported during AWC 2023

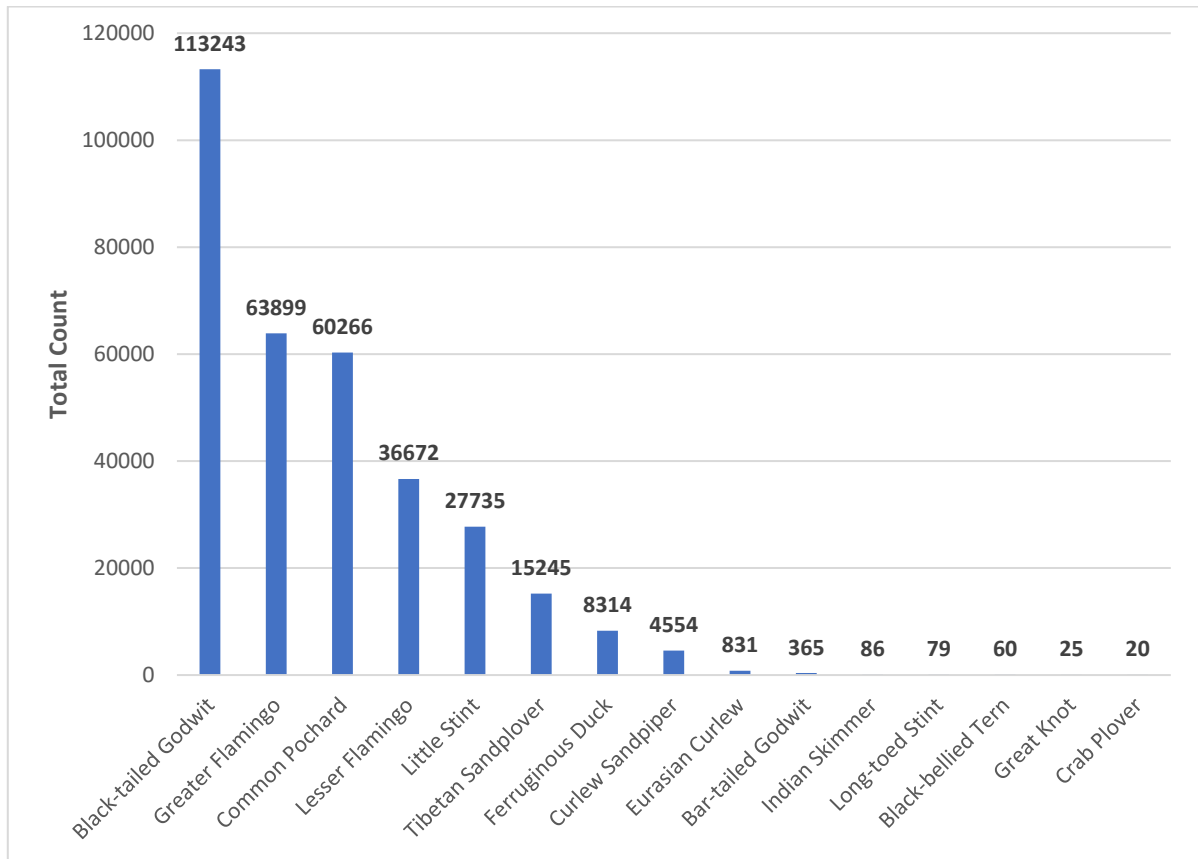

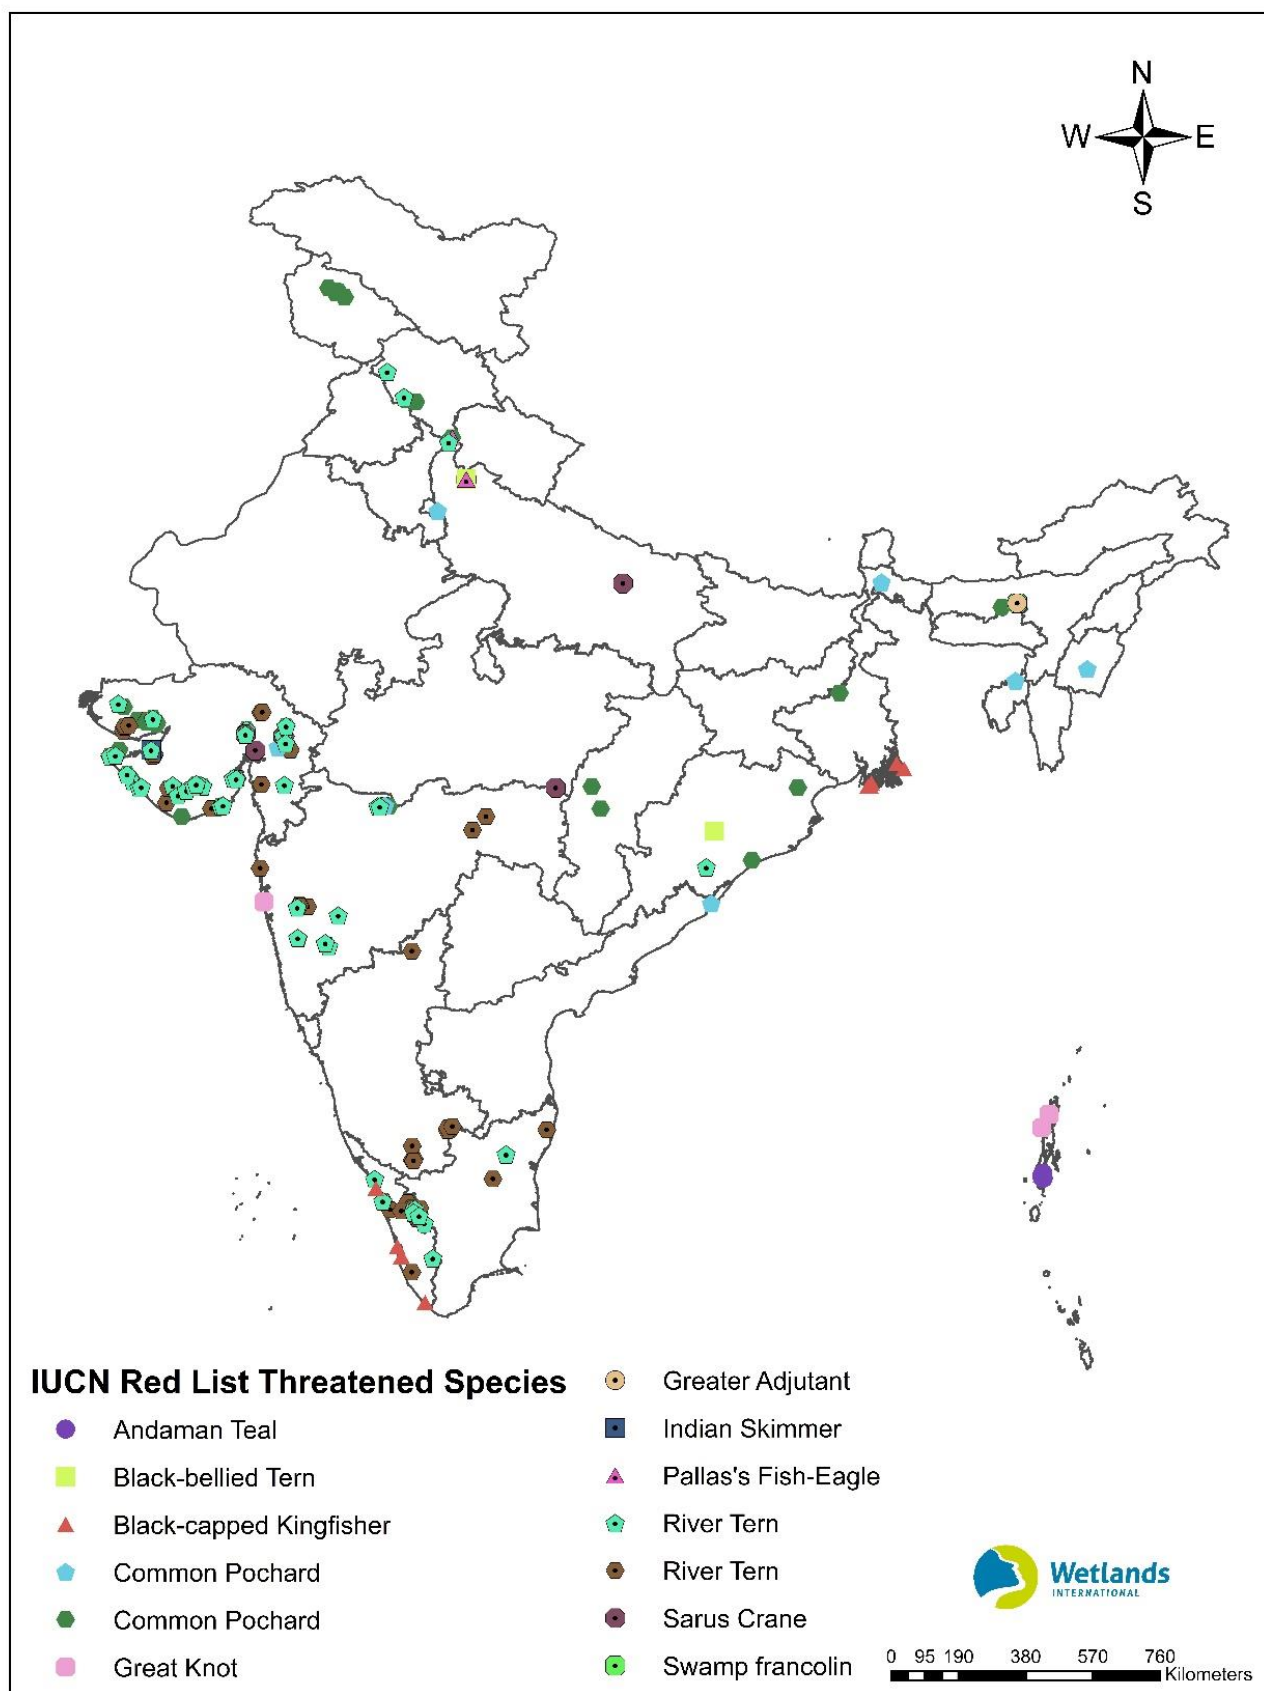

Figure 5 Number of High Priority migratory Species (CAF NAP 2018-23) reported in wetlands during the AWC 2023

Map 3 Locations of IUCN Red List Threatened waterbird and wetland dependent species reported

2.2.3 Wetland assessment

Of the 606 wetlands covered during the AWC 2023, wetland assessments were carried out and reported for 447 wetlands. Of these 296 wetlands are inland/freshwater habitats, whereas the habitat type for 196 wetlands was coastal/saltwater. Based on the wetland coverage during the census, the data was categorised into Complete (100%), Excellent (75-99%), Good (50-75%), Moderate (25-50%), Limited (< 25%), and Partial (not quantified) (Figure 6).

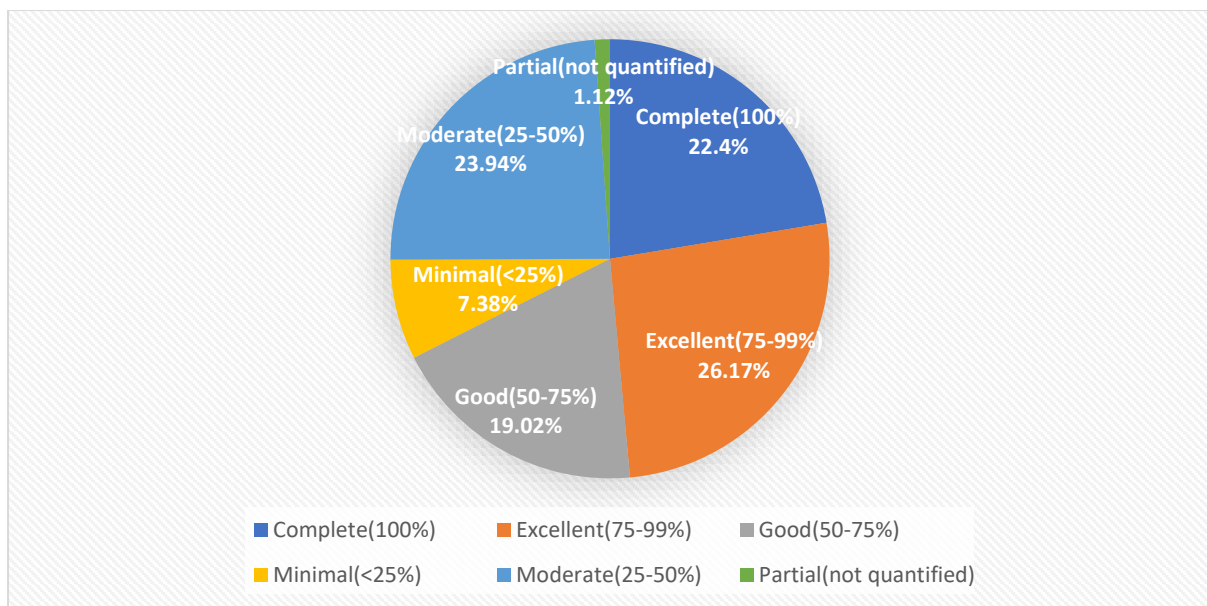

Figure 6 Wetland extent coverage during the AWC 2023

Of the sites where the census duration was recorded, 45% of wetlands were covered in less than thirty minutes, followed by 39% with a census spanning between thirty and sixty minutes, and 16% with a census spanning more than sixty minutes (Figure 7).

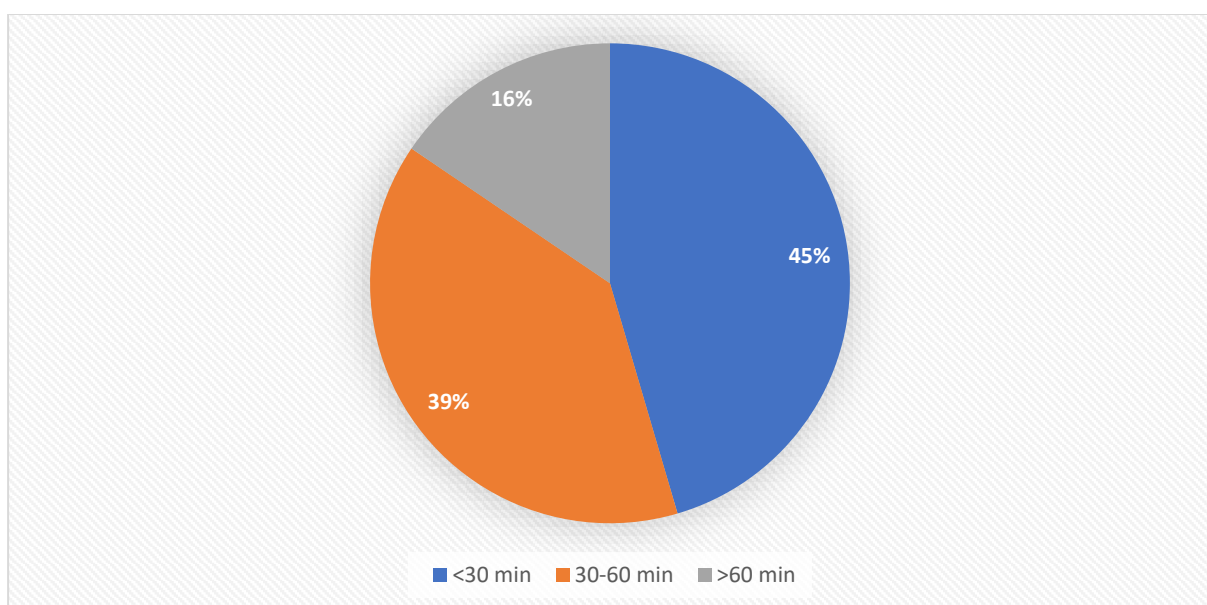

Figure 7 Duration of census reported during the AWC 2023

The census observed multiple threats to wetlands and were categorised into ten categories, pollution due to domestic sewage, solid waste, and pesticides, were the most frequently reported problem (Figure 8 and Image 1). Domestic sewage introduces excessive nutrients and pathogens, leading to eutrophication and degraded water quality, which harm aquatic life and waterbirds. Solid waste, including plastics and other non-biodegradable materials, accumulates in wetlands, causing physical hazards to wildlife and releasing toxic substances as it breaks down. Pesticides from agricultural runoff contaminate water, affecting the health of plants and animals and disrupting ecological balances. These pollutants collectively degrade the ecological integrity of wetlands, impacting biodiversity, water purification functions, and the livelihoods of communities relying on these ecosystems. The agricultural runoff contaminate water and bioaccumulate in the food chain, leading to poisoning, reproductive issues, and population declines in waterbirds. These combined threats significantly disrupt the health, survival, and biodiversity of waterbird species in wetland ecosystems.

Figure 8 Threats to wetlands reported during the AWC 2023

Image 1 Major threats to wetland habitats reported during AWC 2023 census (top left to bottom– Pollution due to solid waste disposal at inlet stream; Pollution due to solid waste disposal at wetland boundary; Water extraction facility at the wetland boundary, Invasive species infestation (Water Hyacinth) in a wetland, Eutrophication)

More than **1,800** volunteers across 25 States and Union Territories viz., Andamans and Nicobar Islands, Andhra Pradesh, Assam, Bihar, Chhattisgarh, Goa, Gujarat, Haryana, Himachal Pradesh, Jammu & Kashmir, Jharkhand, Karnataka, Kerala, Ladakh, Madhya Pradesh, Maharashtra, Manipur, Mizoram, Odisha, Tamil Nadu, Telangana, Tripura, Uttar Pradesh, Uttarakhand, and West Bengal participated in the census (Image 2). The highest number of participants that volunteered in the census were from Kerala (**670 in 116 sites**), followed by Maharashtra (**278 in 72 sites**) and Gujarat (**246 in 96 sites**). Some of the sites recorded their maiden AWC census, such as Gobind Sagar Lake, Himachal Pradesh. The AWC was widely reported in the local media in many states (Image 2). The AWC 2023 observed participation from the SBB/UTBC and their BMC members, Forest and Wildlife departments, municipal corporation, local NGOs, universities, and bird enthusiasts (Image 3). The census data collected was compiled and reviewed by the AWC India State Coordinators and officials of SBBs/UTBCs. The collated state level data was communicated to the AWC India national coordinators for final review and analysis.

3. Opportunities and Challenges

The citizen led AWC fosters participation of diverse stakeholder groups in monitoring and conservation of waterbirds and their habitats. It provides an opportunity to BMC members and other concerned citizens to strengthen People Biodiversity Registers with systematic information on wetlands and waterbirds, and documenting traditional knowledge associated with their conservation and wise-use. Additionally, encouraging local communities and BMC members to become active in wetland Integrated Management Planning.

The information generated through the annual AWC can be used in numerous ways such as determine both short-term and long-term population abundance and richness trends, assisting in the evaluation of wetland condition and its maintenance, promote their sustainable management through wise-use, and encouraging nature-sensitive activities. This joint effort between AWC India, NBA, and State Forest and Wildlife Departments highlighted that such initiatives can help in raising awareness on waterbirds and their conservation issues, wetland positive behaviour, convergence among various conservation policies and programmes, such as the National Plan for Conservation of Aquatic Eco-systems, Amrit Dharohar Initiative, Central Asian Flyway National Action Plan - India, Biodiversity Heritage Sites, Other Effective Area-Based Conservation Measures (OECM), Important Bird and Biodiversity Areas (IBAs), and many others. Although the surveys are primarily focused on assessing waterbird diversity and abundance, the methodology involved often goes beyond the margins of conventional habitat monitoring, delving into the details of the significant aspects of wetland functioning. This involves evaluation of wetland condition through assessment of key features such as water quality, habitat integrity, habitat use, etc. which helps to monitor wetland health status. As a result, it becomes easier to recognise risks to wetland ecosystems, which serve as waterbirds' principal habitat, and to implement management measures to mitigate those threats.

In spite of multi-faceted opportunities and benefits associated with the annual census programme directed primarily at the conservation of wetlands and waterbird habitats, it encounters a number of challenges in its implementation. Primarily, inexperience in waterbirds identification, difference in bird nomenclature, and improper data reporting leads to inferior and disorganised reports. Nonetheless, by means of frequent field visits and capacity-building initiatives, the AWC coordinators and BMC members could overcome this challenge. It is also difficult to determine the current trend of the waterbird population because wetland locations are not consistently covered. Another challenge is the infrequency of complete or reported wetland assessments of count sites, which leaves a gap in the information needed to evaluate the health status of wetland habitat and current and potential threats to birds and their habitats.

4. Way Forward

Strengthening the AWC and improving the overall census activity in India, the following measures can be taken:

1. Implementation:

- a) Expanding the network of AWC coordinators throughout the country, ensuring each state and union territory has a coordinator, and if required, engage regional assistant coordinators for better implementation of the census.

- b) Developing the capacity of coordinators through yearly training sessions and encouraging interaction amongst coordinators to share experiences and expertise regarding planning for the implementation of the census, data collection, and reporting.
- c) Since AWC is a citizen science programme, involving the appropriate line department can help to foster a sense of ownership and ensure regular census and reporting. For example, the state wetland authority, forest department, research organisations, avifaunal experts, local communities, and others can be engaged.
- d) Comprehending the population trends of waterbird species at the regional and national levels, ensuring that sites that have already been assessed under AWC are surveyed every year.

2. Data collection and analysis:

- a) Improving database management through standardised data collection methods for efficient data collation, data analysis, and reporting which align with the IWC data interface.
- b) Ensuring that data reporting is completed within the allotted time frame for effective data collation and analysis.

3. Communication:

- a) Identifying AWC champions in each village panchayat and BMC in consultation with SBB/UTBC and AWC state coordinator. AWC reports, state media coverage, etc. can feature the stories of the AWC champions, wetland mitras, and coordinators who made outstanding contributions to the census as a way to show gratitude and inspire others.
- b) Expanding the reach of AWC network by incorporating local communities, institutions, schools, etc. for being a part of the census and raising awareness regarding the same.
- c) Sharing database with other relevant citizen science groups and initiatives.

4. Management and monitoring:

- a) Improving the monitoring and management of waterbird species and their habitats, it is important to identify the habitats of waterbirds that are located inside the protected area network and perform yearly and seasonal censuses. In addition, incorporate the necessary management activities for waterbird conservation and management into all protected area management plans.
- b) Devising participatory conservation action plans for priority wetlands and species.
- c) Incorporation of AWC results into regional People's Biodiversity Register so as to create an extensive database of various aspects of biodiversity.

Annex 2. State and Union Territory-wise list of waterbird and wetland-dependent bird species reported in AWC 2023

Species name	Common name	Total count	No. of sites
Andamans and Nicobar Islands		11789	46
<i>Actitis hypoleucos</i>	Common Sandpiper	395	46
<i>Alcedo atthis</i>	Common Kingfisher	51	29
<i>Alcedo meninting</i>	Blue-eared Kingfisher	9	5
<i>Amaurornis phoenicurus</i>	White-breasted Waterhen	74	31
<i>Charadrius alexandrinus</i>	Kentish Plover	11	5
<i>Charadrius atrifrons</i>	Tibetan Sandplover	827	40
<i>Charadrius leschenaultii</i>	Greater Sandplover	282	24
<i>Anas albogularis</i>	Andaman Teal	1100	5
<i>Ardea alba</i>	Great White Egret	435	34
<i>Ardea cinerea</i>	Grey Heron	12	6
<i>Ardea intermedia</i>	Intermediate Egret	203	23
<i>Ardea purpurea</i>	Purple Heron	7	4
<i>Ardeola grayii</i>	Indian Pond-heron	23	9
<i>Arenaria interpres</i>	Ruddy Turnstone	1	1
<i>Bubulcus ibis</i>	Cattle Egret	469	13
<i>Butorides striata</i>	Green-backed Heron	117	40
<i>Calidris alba</i>	Sanderling	1	1
<i>Calidris falcinellus</i>	Broad-billed Sandpiper	1	1
<i>Calidris ferruginea</i>	Curlew Sandpiper	196	19
<i>Calidris ruficollis</i>	Red-necked Stint	29	7
<i>Calidris subminuta</i>	Long-toed Stint	74	9
<i>Calidris tenuirostris</i>	Great Knot	23	2
<i>Charadrius dubius</i>	Little Ringed Plover	37	7
<i>Chlidonias hybrida</i>	Whiskered Tern	6	1
<i>Dendrocygna javanica</i>	Lesser Whistling-duck	924	11
<i>Dromas ardeola</i>	Crab-plover	20	2
<i>Egretta garzetta</i>	Little Egret	263	29
<i>Egretta sacra</i>	Pacific Reef-egret	32	6
<i>Fulica atra</i>	Common Coot	1	1
<i>Gallicrex cinerea</i>	Watercock	23	8
<i>Gallinago gallinago</i>	Common Snipe	25	7
<i>Gallinago stenura</i>	Pin-tailed Snipe	27	17
<i>Gallinula chloropus</i>	Common Moorhen	412	16
<i>Gelochelidon nilotica</i>	Common Gull-billed Tern	3	1
<i>Glareola maldivarum</i>	Oriental Pratincole	15	4
<i>Halcyon coromanda</i>	Ruddy Kingfisher	8	7
<i>Halcyon pileata</i>	Black-capped Kingfisher	1	1
<i>Halcyon smyrnensis</i>	White-breasted Kingfisher	137	39
<i>Hirundo rustica</i>	Barn Swallow	216	26
<i>Hydrophasianus chirurgus</i>	Pheasant-tailed Jacana	27	3

Species name	Common name	Total count	No. of sites
<i>Ichthyophaga leucogaster</i>	White-bellied Sea-eagle	57	37
<i>Ixobrychus cinnamomeus</i>	Cinnamon Bittern	24	9
<i>Ixobrychus sinensis</i>	Yellow Bittern	29	15
<i>Lewinia striata</i>	Slaty-breasted Rail	19	10
<i>Limosa lapponica</i>	Bar-tailed Godwit	264	14
<i>Limosa limosa</i>	Black-tailed Godwit	48	4
<i>Motacilla cinerea</i>	Grey Wagtail	116	17
<i>Motacilla flava</i>	Western Yellow Wagtail	251	26
<i>Nettapus coromandelianus</i>	Cotton Pygmy-goose	60	2
<i>Numenius arquata</i>	Eurasian Curlew	254	24
<i>Numenius phaeopus</i>	Whimbrel	730	42
<i>Pandion haliaetus</i>	Osprey	1	1
<i>Pelargopsis capensis</i>	Stork-billed Kingfisher	71	30
<i>Pluvialis fulva</i>	Pacific Golden Plover	624	42
<i>Pluvialis squatarola</i>	Grey Plover	30	4
<i>Poliolimnas cinereus</i>	White-browed Crake	1	1
<i>Porphyrio porphyrio</i>	Purple Swamphe	216	13
<i>Rallina canningi</i>	Andaman Crake	2	1
<i>Sterna saundersi</i>	Saunders's Tern	12	1
<i>Sterna sumatrana</i>	Black-naped Tern	148	2
<i>Sternula albifrons</i>	Little Tern	290	13
<i>Tadorna ferruginea</i>	Ruddy Shelduck	1	1
<i>Thalasseus bengalensis</i>	Lesser Crested Tern	632	21
<i>Todiramphus chloris</i>	Collared Kingfisher	133	41
<i>Tringa glareola</i>	Wood Sandpiper	153	12
<i>Tringa nebularia</i>	Common Greenshank	68	6
<i>Tringa ochropus</i>	Green Sandpiper	1	1
<i>Tringa stagnatilis</i>	Marsh Sandpiper	33	4
<i>Tringa totanus</i>	Common Redshank	886	42
<i>Vanellus cinereus</i>	Grey-headed Lapwing	8	4
<i>Xenus cinereus</i>	Terek Sandpiper	107	12
<i>Zapornia fusca</i>	Ruddy-breasted Crake	1	1
<i>Zapornia pusilla</i>	Baillon's Crake	1	1
<i>Ardeola grayii</i>	Indian Pond-heron	1	1
Andhra Pradesh		2607	4
<i>Actitis hypoleucos</i>	Common Sandpiper	114	1
<i>Alcedo atthis</i>	Common Kingfisher	3	1
<i>Amaurornis phoenicurus</i>	White-breasted Waterhen	2	1
<i>Anas acuta</i>	Northern Pintail	312	1
<i>Anas poecilorhyncha</i>	Indian Spot-billed Duck	5	1
<i>Anastomus oscitans</i>	Asian Openbill	55	1
<i>Anhinga melanogaster</i>	Oriental Darter	28	1
<i>Ardea alba</i>	Great White Egret	105	1

Species name	Common name	Total count	No. of sites
<i>Ardea cinerea</i>	Grey Heron	3	1
<i>Ardea intermedia</i>	Intermediate Egret	53	1
<i>Ardea purpurea</i>	Purple Heron	9	1
<i>Ardeola grayii</i>	Indian Pond-heron	16	1
<i>Aythya ferina</i>	Common Pochard	9	1
<i>Aythya fuligula</i>	Tufted Duck	9	1
<i>Bubulcus ibis</i>	Cattle Egret	177	1
<i>Ceryle rudis</i>	Pied Kingfisher	8	1
<i>Charadrius dubius</i>	Little Ringed Plover	3	1
<i>Chlidonias hybrida</i>	Whiskered Tern	2	1
<i>Dendrocygna javanica</i>	Lesser Whistling-duck	202	1
<i>Egretta garzetta</i>	Little Egret	6	1
<i>Fulica atra</i>	Common Coot	23	1
<i>Gallinula chloropus</i>	Common Moorhen	12	1
<i>Halcyon smyrnensis</i>	White-breasted Kingfisher	6	1
<i>Haliastur indus</i>	Brahminy Kite	2	1
<i>Himantopus himantopus</i>	Black-winged Stilt	208	1
<i>Hirundo rustica</i>	Barn Swallow	12	1
<i>Hydrophasianus chirurgus</i>	Pheasant-tailed Jacana	21	1
<i>Ixobrychus flavicollis</i>	Black Bittern	1	1
<i>Ixobrychus sinensis</i>	Yellow Bittern	5	2
<i>Lewinia striata</i>	Slaty-breasted Rail	1	1
<i>Mareca penelope</i>	Eurasian Wigeon	11	1
<i>Mareca strepera</i>	Gadwall	6	1
<i>Metopidius indicus</i>	Bronze-winged Jacana	16	1
<i>Microcarbo niger</i>	Little Cormorant	24	1
<i>Motacilla flava</i>	Western Yellow Wagtail	7	1
<i>Mycteria leucocephala</i>	Painted Stork	305	1
<i>Netta rufina</i>	Red-crested Pochard	8	1
<i>Nettapus coromandelianus</i>	Cotton Pygmy-goose	13	1
<i>Numenius phaeopus</i>	Whimbrel	1	1
<i>Pelecanus philippensis</i>	Spot-billed Pelican	151	1
<i>Phalacrocorax carbo</i>	Great Cormorant	2	1
<i>Plegadis falcinellus</i>	Glossy Ibis	8	1
<i>Podiceps cristatus</i>	Great Crested Grebe	8	1
<i>Porphyrio porphyrio</i>	Purple Swamphen	18	1
<i>Recurvirostra avosetta</i>	Pied Avocet	112	1
<i>Spatula clypeata</i>	Northern Shoveler	12	1
<i>Spatula querquedula</i>	Garganey	8	1
<i>Tachybaptus ruficollis</i>	Little Grebe	6	1
<i>Tadorna ferruginea</i>	Ruddy Shelduck	2	1
<i>Threskiornis melanocephalus</i>	Black-headed Ibis	21	1
<i>Tringa glareola</i>	Wood Sandpiper	219	1

Species name	Common name	Total count	No. of sites
<i>Tringa totanus</i>	Common Redshank	209	1
<i>Vanellus cinereus</i>	Grey-headed Lapwing	3	1
<i>Vanellus indicus</i>	Red-wattled Lapwing	21	1
<i>Xenus cinereus</i>	Terek Sandpiper	2	1
<i>Zapornia fusca</i>	Ruddy-breasted Crake	1	1
<i>Zapornia pusilla</i>	Baillon's Crake	1	1
Assam		22647	7
<i>Actitis hypoleucos</i>	Common Sandpiper	15	3
<i>Alcedo atthis</i>	Common Kingfisher	10	4
<i>Charadrius atrifrons</i>	Tibetan Sandplover	1	1
<i>Anas acuta</i>	Northern Pintail	2562	6
<i>Anas crecca</i>	Common Teal	3952	5
<i>Anas platyrhynchos</i>	Mallard	120	3
<i>Anas poecilorhyncha</i>	Indian Spot-billed Duck	186	6
<i>Anastomus oscitans</i>	Asian Openbill	325	7
<i>Anhinga melanogaster</i>	Oriental Darter	7	2
<i>Anser anser</i>	Greylag Goose	833	4
<i>Anser indicus</i>	Bar-headed Goose	439	3
<i>Ardea alba</i>	Great White Egret	68	7
<i>Ardea cinerea</i>	Grey Heron	178	3
<i>Ardea intermedia</i>	Intermediate Egret	112	6
<i>Ardea purpurea</i>	Purple Heron	85	7
<i>Ardeola grayii</i>	Indian Pond-heron	136	7
<i>Aythya ferina</i>	Common Pochard	31	2
<i>Aythya fuligula</i>	Tufted Duck	20	2
<i>Aythya nyroca</i>	Ferruginous Duck	285	4
<i>Bubulcus ibis</i>	Cattle Egret	71	7
<i>Calidris temminckii</i>	Temminck's Stint	10	3
<i>Ceryle rudis</i>	Pied Kingfisher	12	4
<i>Charadrius dubius</i>	Little Ringed Plover	24	3
<i>Ciconia episcopus</i>	Asian Woollyneck	1	1
<i>Circus spilonotus</i>	Eastern Marsh-harrier	1	1
<i>Dendrocygna bicolor</i>	Fulvous Whistling-duck	181	2
<i>Dendrocygna javanica</i>	Lesser Whistling-duck	4640	5
<i>Egretta garzetta</i>	Little Egret	100	7
<i>Ephippiorhynchus asiaticus</i>	Black-necked Stork	15	1
<i>Fulica atra</i>	Common Coot	60	2
<i>Gallinago gallinago</i>	Common Snipe	23	4
<i>Gallinago stenura</i>	Pin-tailed Snipe	1	1
<i>Gallinula chloropus</i>	Common Moorhen	211	2
<i>Halcyon smyrnensis</i>	White-breasted Kingfisher	30	5
<i>Himantopus himantopus</i>	Black-winged Stilt	153	2
<i>Hirundo rustica</i>	Barn Swallow	449	4

Species name	Common name	Total count	No. of sites
<i>Hydrophasianus chirurgus</i>	Pheasant-tailed Jacana	80	4
<i>Ixobrychus cinnamomeus</i>	Cinnamon Bittern	2	2
<i>Ixobrychus sinensis</i>	Yellow Bittern	1	1
<i>Leptoptilos dubius</i>	Greater Adjutant	5	1
<i>Leptoptilos javanicus</i>	Lesser adjutant	309	4
<i>Lewinia striata</i>	Slaty-breasted Rail	1	1
<i>Limosa limosa</i>	Black-tailed Godwit	6	1
<i>Lymnocyrtus minimus</i>	Jack Snipe	1	1
<i>Mareca falcata</i>	Falcated Duck	5	2
<i>Mareca penelope</i>	Eurasian Wigeon	2163	6
<i>Mareca strepera</i>	Gadwall	983	7
<i>Metopidius indicus</i>	Bronze-winged Jacana	74	5
<i>Microcarbo niger</i>	Little Cormorant	383	7
<i>Motacilla alba</i>	White Wagtail	8	3
<i>Motacilla citreola</i>	Citrine Wagtail	40	3
<i>Mycteria leucocephala</i>	Painted Stork	1	1
<i>Netta rufina</i>	Red-crested Pochard	58	2
<i>Nettapus coromandelianus</i>	Cotton Pygmy-goose	36	4
